

Soplang.

Soplang is the first Somali programming language, designed to make programming easier and more accessible for Somali speakers. It uses Somali keywords and syntax instead of English, allowing beginners, students, and educators to learn coding in their native language. Soplang aims to promote digital literacy, preserve the Somali language in technology, and encourage more people in Somalia to participate in software development and innovation.

Who founded Soplang?

Soplang was founded by Sharafdin (Mr Sharafdin)

He started developing it in 2023 with the goal of creating the first programming language for Somali speakers. The language uses Somali keywords to make programming easier for beginners and to promote the Somali language in technology.
